Consistent with Article 18(E) of the TAAAC and AACPS Collective Bargaining Agreement, CDC and MDH safety recommendations, along with the safety recommendations listed on the AACPS website, we raise the following safety concerns and seek guidance on correcting this issue:

- ☐No in room ventilation
- ☐ Need support in establishing 3 feet of social distancing
- ☐ Enforcement of the mask mandate
- ☐ No obvious cleaning of the common areas or other work locations
- ☐ Questions about where to send a symptomatic student
- ☐Other _____

Thank you for your quick attention to this matter. Also, including safety concerns for discussion during FAC meetings as we navigate the pandemic would support a safe learning environment, staff morale, and allow all of us to move in the same direction in providing our students and families the healthiest environment possible under these circumstances.
